Vagalume
Last.fm client for Gnome and Maemo

Alberto Garcia
http://people.igalia.com/berto/
• One of the coolest web 2.0 sites:
  • It's a personalized internet radio.
  • It's a music recommendation system.
  • It's a social network.
Vagalume

- A small Last.fm client (~140K as of v0.7)
- Written in C
- Based on Gnome technologies:
  - GTK+ / GLib
  - GStreamer
  - Libxml2
- Designed specially for the Maemo platform (Nokia 770 / N800 / N810)
- Experimental support for Moblin
First release

- November 2007: a < 50 KB binary with the essential features. Very basic UI
Vagalume evolves

- First goal: cover all basic Last.fm functionalities
- Achieved in v0.4 (14 Dec 2007)
- This is how it looks now:
Send recommendations

0:26 / 6:59
Remote control

• Vagalume can be controlled using D-BUS
• Helper program vagalumectl provided:

$ vagalumectl play
$ vagalumectl loved SomeUser
$ vagalumectl tag “hard rock”
$ vagalumectl skip
$ vagalumectl stop
Tray icon

Vagalume - A music player for Maemo

Vagalume is a Linux Music player developed by me and some colleagues at Igalia. Although it works well in the Maemo platform, it is also designed to work in the N800 platform and devices such as the 770, N800 and N810.

- The Clash
  - Should I Stay or Should I Go
  - Combat Rock
  - Stop
  - Skip

Some ideas for future releases

- Some of these are already being worked on:
  - Show lyrics of the current track
  - Sleep timer
  - Alarm clock
  - Pause button
  - History (recently played)
